The Kentucky Framework for Teaching with Specialist Frameworks for Other Professionals

The Kentucky Framework for Teaching is designed to support student achievement and professional practice through the performance measures of:

Framework for Teaching

Planning
Environment
Instruction
Professionalism

Specialist Frameworks for Other Professionals

Planning
Environment
Instruction
Professionalism

The Frameworks also include themes such as equity, cultural competence, high expectations, developmental appropriateness, accommodating individual needs, effective technology integration, and student assumption of responsibility. They provide structure for feedback for continuous improvement through individual goals that professional growth, thus supporting overall school improvement. Evidence documenting professional practice is situated within one or more of the four performance measures of the framework. Performance is rated for each component according to four performance levels: Ineffective, Developing, Accomplished, and Exemplary. The summative rating is a holistic representation of performance, combining data from multiple sources of evidence across each performance measure.

The use of professional judgment based on multiple sources of evidence promotes a holistic and comprehensive analysis of practice, rather than over-reliance on one individual data point or rote calculation of practice based on predetermined formulas. Evaluators also take into account how educators respond to or apply additional supports and resources designed to promote student learning, as well as their own professional growth and development. Finally, professional judgment gives evaluators the flexibility to account for a wide variety of factors related to individual educator performance, such as: school-specific priorities that may drive practice in one performance measure, an educator's number of goals, experience level and/or leadership opportunities, and contextual variables that may impact the learning environment, such as unanticipated outside events or traumas.

Evaluators must use the following categories of evidence in determining overall ratings:

Required Sources of Evidence

- Professional Growth Planning and Self-Reflection
- Observation

All evidence submitted will be documented & stored electronically.

Optional Sources of Evidence

Optional sources of evidence and products, documented & submitted electronically, may include, but are not limited to:

- Action research
- Communication logs
- Engagement in professional organizations
- Evidence of individual or small group teacher and student support
- Extracurricular engagement
- Lesson plans
- Minutes from PLCs

- Other items deemed appropriate by the evaluator or the teacher or other professionals
- Parent engagement surveys
- Professional Learning Artifacts
- Promotional programming evidence to support student learning (KY Bluegrass Awards, Operation Preparation, etc.)
- Records of student and/or teacher attendance
- Student data records
- Student formative and/or summative course evaluations/feedback
- Student work
- Teacher committee or team contributions
- Teacher interviews
- Teacher reflections and/or self-reflections
- Team-developed curriculum units
- Timely, targeted feedback from mini or informal observations
- Videoed lessons
- Virtual platform recording

All optional evidence submitted will be considered equally for all measures.

Certified staff that hold dual roles will be evaluated using the framework, either TPGES or OPGES, that is based on the role in which they are performing the majority of the instructional day.

TPGES/OPGES Components

Self-Reflection and Professional Growth Planning

Reflective practices and professional growth planning are iterative processes. The teacher or other professional (1) reflects on his or her current growth needs based on multiple sources of data and identifies an area or areas for focus; (2) collaborates with his or her administrator to develop a professional growth plan and action steps; (3) implements the plan; (4) regularly reflects on the progress and impact of the plan on his or her professional practice; (5) modifies the plan as appropriate; (6) continues implementation and ongoing reflection; (7) and, finally, conducts a summative reflection on the degree of goal attainment and the implications for next steps.

The Professional Growth Plan addresses realistic, focused, and measurable professional goals. The plan connects data from multiple sources including classroom observation feedback, data on student achievement, and professional growth needs identified through self-assessment and reflection. In collaboration with the administrators, teachers identify explicit goals, which drive the focus of professional growth activities, support, and on-going reflection.

Required

- ♦ **All Teachers and Other Professionals will participate in self-reflection and professional growth planning each year.**

All certified staff will be required to use the district-approved forms to record, document, and monitor their Self-Reflections and PGPs.

The template that all TPGES participants will use is included in the TPGES Appendix and in the district approved online Evaluation Management System.

OPGES participants will be utilizing a job specific Self-Reflection template. The templates are included in the OPGES Appendix and in the district approved online Evaluation Management System.

NOTES:

- Days are defined as instructional days from 1st day of school or 1st instructional day following employment
- Timeline can be affected by number of instructional days worked.
- If an employee in their summative evaluation year misses more than 90 days, the superintendent or designee may suspend the summative evaluation until the next school year.
- All certified staff will receive evaluation training, including all contents & forms of the Newport CEP, within the first 30 days of reporting to work for the school year.
- Certified staff that hold dual roles will be evaluated using the framework, either TPGES or OPGES, that is based on the role in which they are performing the majority of the instructional day.

Observation

The observation process is one source of evidence to determine educator effectiveness that includes supervisor observation for each certified teacher and other professional. The supervisor observation provides *documentation and feedback* to measure the effectiveness of professional practice.

Observation Model

The observation model must fulfill the following minimum criteria:

Required

- ♦ **1-Year Cycle: Two (2) observations in the summative cycle**
- ♦ **3-Year Cycle: Three (3) observations in the summative cycle**
- ♦ **Final observation is conducted by the supervisor and is a full observation.**

Evaluators will be required to record their observation data in the district-approved forms that will be utilized for data and evidence collection.

Certified staff that hold dual roles will be evaluated using the framework, either TPGES or OPGES, that is based on the role in which they are performing the majority of the instructional day.

Observation Schedule

Required

- ♦ **Observations may begin after the evaluation training takes place within 30 calendar days of reporting for employment each school year.**

All observation requirements for 1-Year Summative, 3-Year Summative, and late hires can be found in the **PGES System Component Timeline for Teachers and Other Professionals** table. The table includes requirements for both TPGES and OPGES participants.

District Observation Requirements for 1-Year Cycle & 3-Year Cycles

Observers and evaluatees will adhere to the following observation conferencing requirements for TPGES & OPGES

1-Year Cycle

- Teachers and Other Professionals are evaluated annually. A minimum of two (2) observations shall be completed by the supervisor in the one-year summative cycle.

1-Year & 3-Year Cycles

- 1-Year Cycle: One (1) observation conducted by the supervisor may be completed anytime during the summative cycle prior to the full observation.
- 3-Year Cycle: Two (2) observation conducted by the supervisor may be completed anytime during the summative cycle prior to the full observation.
- The observations may be mini or full **and are either announced or unannounced**.
- During the observations, the observer will make notes of the components observed in order to provide meaningful feedback to the evaluatee.
- The final observation shall be a full observation conducted and scheduled (announced) by the supervisor during the summative cycle.
- At any given time during a non-tenured teacher's cycle, additional observations by the evaluator may be conducted, if growth is needed (teacher practices that result in ineffective determination for a component might be a reason for the additional observation feedback).
- All observations must be documented on district-approved forms or in the district online Evaluation Management System as decided by the district.
- Other Professionals observations may receive an observation that looks closer to the administrative site visits.

PARTIAL/FULL OBSERVATIONS DURING THE CYCLE

- Pre-Observation Conferences are optional (to be determined by the evaluator) for partial observations. Post-Observation Conferences for partial observations shall be followed by meaningful feedback within five (5) working days electronically, in person, or virtually (as determined by the evaluator).

***May be announced/unannounced**

LAST FULL OBSERVATION OF THE CYCLE

Pre-Observation Form shall be submitted 5 working days prior to the observation for the last full summative evaluation in person. Post-Observation Conferences are to be conducted for all full observations in person or through a virtual platform (video on/recorded) and shall take place within five (5) working days after the observation.

***Must be announced/scheduled**

SUMMATIVE EVALUATION CONFERENCE

- The summative evaluation conference shall be held at the end of the summative evaluation cycle.
- 1-year cycle teachers and other professionals will be completed by April 30 of each year
- 3-Year cycle teachers and other professionals will be completed by April 30 of the summative year
- Supervisors must record summative ratings in the district approved forms or in the district online Evaluation Management System as decided by the district.

Observation Conferencing

Observers will adhere to the following observation conferencing requirements for teachers and other professionals:

Required

- ♦ **Conduct observation post-conference within five working days following each observation.**

All Pre-Conference forms and Post-Conference forms are included in the Appendix for TPGES and OPGES and in the district online Evaluation Management System. OPGES participant forms are job-specific and aligned to their individual framework.

Observer Certification

All administrators serving as a primary evaluator must complete the Initial 2-Day Certified Evaluation Training prior to conducting observations for the purpose of evaluation.

All administrators will complete a minimum of six (6) hours annually of EILA-approved Evaluation Training.

In addition to the initial 2-Day Certified Evaluation Training, administrators must also complete additional training since observation is utilized as a required source of evidence. To ensure consistency of observations, evaluators must also be trained, tested and approved using the Proficiency Observation Training for the current approved district program. The system allows observers to develop a deep understanding of how the four performance measures of the Kentucky Framework for Teaching (FfT) are applied in observation.

- ♦ **Only supervisors who have passed the proficiency assessment can conduct mini and full observations for the purpose of evaluation. In the event that a supervisor has yet to complete the proficiency assessment, or if the supervisor does not pass the assessment, the district will provide the following supports:**
 - **Observation data provided by a substitute observer is considered a valid source of evidence only if the supervisor is present in the observation.**
 - In the event a supervisor suffers an emergency situation such as prolonged illness, death of a significant other, etc., the district office can waive the presence of the supervisor.
 - **In cases where the supervisor is not certified through the proficiency system and is therefore unable to conduct observations during the observation window, the district will determine how to ensure teachers and other professionals have access to observations by making the following local decisions.**
 - Upon hiring, the district will purchase a district-approved supervisor's certification platform license for a supervisor who does not have certification.
 - The supervisor will have 45 working days to take the proficiency assessments via the district approved supervisor's certification platform

Upon selection as a principal or assistant principal, the administrator will receive Initial Evaluation Training through the state approved provider prior to evaluating teachers or other professionals. The following table includes district requirements for Observer Certification.

Observer Certification		
Training Stage	Methodology	Timeline
Initial Training	Prior to taking the assessments initially, a supervisor <u>may</u> request the support and assistance of a PGES certified observer	First 45 working days
Unsuccessful Completion 1 st Attempt, 10 calendar day lockout	The Superintendent or designee will assign a mentor to supply guidance and support as requested by the supervisor	Certification to be completed by the first 60 working days
Unsuccessful Completion 2 nd Attempt, 90 calendar day lockout	The Superintendent or designee will assign a mentor who will then review assessment results with the supervisor, determine targeted areas, schedule study sessions required	Certification to be completed by the first 125 working days
If the non-certified supervisor fails to complete observer certification assessment after a complete license cycle (one year) this will be cause for demotion or replacement as the supervisor (principal/assistant principal).		

*Late hires will have the first 45 working days to obtain certification, an additional 15 working days if unsuccessful on the first attempt, and an additional 80 working days if unsuccessful on the 2nd attempt.

Teachers will have access to certified observers for observations and feedback in cases where their immediate supervisor is not certified through the proficiency system and therefore unable to conduct the observation. District-level personnel or principals from another building (certified through the proficiency system) and designated by the superintendent, will conduct the observation with the principal, modeling the process, and providing mentorship of the proficiency system for the supervisor. Observation data provided by a substitute observer is considered a valid source of evidence only if the supervisor participated (passively) in the observation. Passive involvement will be waived in cases where a supervisor is unable to participate (long-term leave or other extenuating circumstances approved by the Superintendent).

Observer Calibration

Calibration ensures ongoing accuracy in scoring teaching practice; an awareness of the potential risk for rater bias; and ensures observers refresh their knowledge of the training and scoring practice. As certified observers may tend to experience “drift” in rating accuracy, the district completes a calibration process to ensure consistency of observations. Evaluators must complete the district-determined observer calibration training annually. The training allows observers to develop a deeper understanding of how the four Performance Measures of the Kentucky Framework for Teaching (FfT) are applied in observations.

Required

- ♦ **Observer calibration is conducted annually, after the initial certification, based on the district-determined process.**

Determining the Overall Summative Ratings

Supervisors are responsible for determining an Overall Summative Rating for each teacher or other professional at the conclusion of the summative evaluation year. The Overall Summative Rating is informed by the educator's ratings on performance measures. The evaluator determines the Overall Summative Rating based on professional judgment informed by evidence that demonstrates the educator's performance against the Performance Measures and decision rules that establish a common understanding of performance thresholds to which all educators are held.

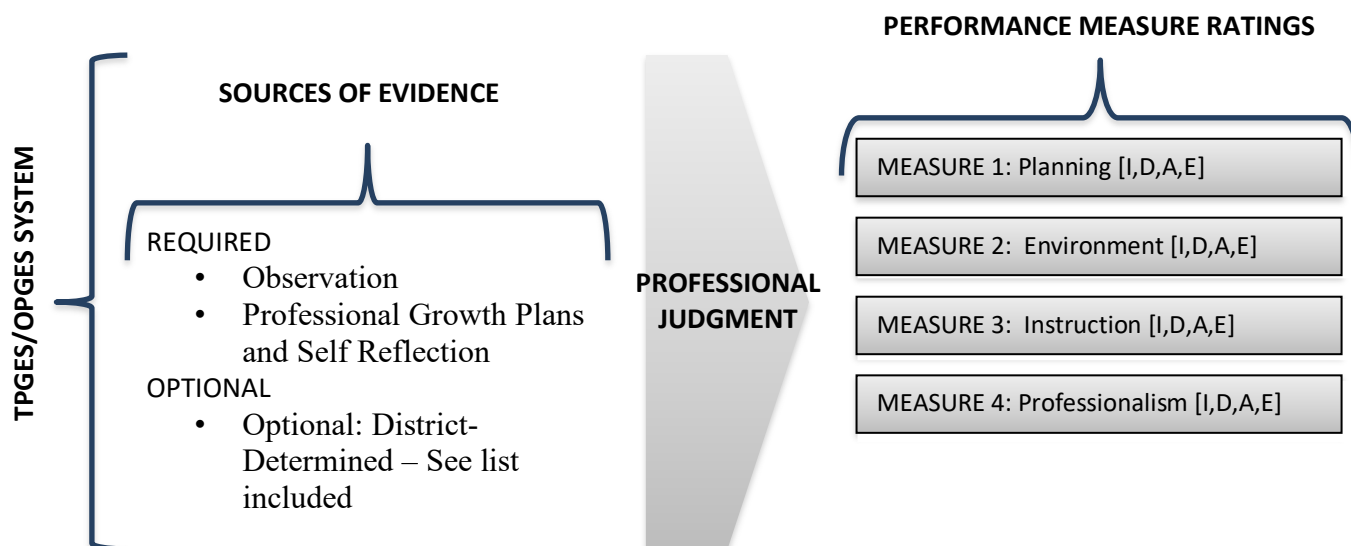

Rating Performance Measures

The Kentucky Framework for Teaching stands as the critical rubric for providing educators and evaluators with concrete descriptions of practice associated with specific performance measure. Each element describes a discrete behavior or related set of behaviors that educators and evaluators can prioritize for evidence gathering, feedback, and eventually, evaluation. Supervisors organize and analyze evidence for each individual educator based on these concrete descriptions of practice.

The process concludes with the evaluator's analysis of evidence and the final assessment of practice in relation to performance described under each Performance Measure at the culmination of an educator's cycle.

Required

- ♦ **A rating for each performance measure based on both required & optional evidence.**
- ♦ **All ratings must be recorded in the district-approved forms.**
- ♦ **All summative forms will be documented in writing or electronically & stored in the official personnel record for summative evaluations or in the on-line district employee management system as determined by the district.**
- ♦ **All evidence will be submitted & stored electronically or in the on-line district employee management system as determined by the district.**
- ♦ **All CEP plan requirements are submitted and recorded either electronically or in the on-line district employee evaluation system by using the district-approved forms in the Appendices as determined by the district.**
- ♦ **The evalutee may submit a written statement in response to the summative rating on the Summative Evaluation form & this response will be stored in the official personnel record or as an artifact in the on-line district employee evaluation management system as determined by the district.**

Determining Overall Summative Rating

- The individual performance measure ratings are equally weighted.
- Optional evidence submitted & documented electronically or in the on-line employee evaluation management system will be considered equally for all measures.
- Apply chart below for determining an educator's Overall Summative rating.
- All summative ratings must be recorded in the district-approved forms.

CRITERIA FOR DETERMINING A TEACHER'S OVERALL SUMMATIVE RATING

IF...	THEN...
Performance Measures 2 AND 3 are rated INEFFECTIVE	Summative Rating shall be INEFFECTIVE
Performance Measures 2 AND 3 are rated DEVELOPING	Summative Rating shall be DEVELOPING
Performance Measures 2 AND 3 are rated ACCOMPLISHED, and Performance Measures 1 AND 4 are at least DEVELOPING	Summative Rating shall be ACCOMPLISHED
Any Performance Measures rated INEFFECTIVE	Summative Rating shall NOT be higher than DEVELOPING
Two Performance Measures are rated DEVELOPING, and two Performance Measures are rated ACCOMPLISHED	Summative Rating shall be ACCOMPLISHED
Two Performance Measures are rated DEVELOPING, and two Performance Measures are rated EXEMPLARY	Summative Rating shall be ACCOMPLISHED
Performance Measures 1 AND 4 are rated at least ACCOMPLISHED, and Performance Measures 2 AND 3 are rated EXEMPLARY	Summative Rating shall be EXEMPLARY

NOTE: A teacher or other professional whose overall summative rating falls in the Ineffective sector of the above chart will automatically be placed on a Certified Assistance Plan. Principals may also determine the need for placing certified staff on a Corrective Action Plan at any time during the year based on data/need.

Principal Professional Growth and Effectiveness System Components

Overview and Summative Model

The following graphic outlines the summative model for the Principal Professional Growth and Effectiveness System.

Evaluators will look for trends and patterns in practice across multiple types of evidence and apply their professional judgment based on this evidence when evaluating a principal. The role of evidence and professional judgment in the determination of ratings on standards and an overall rating is paramount in this process. However, professional judgment must be grounded in the common framework identified: The Principal Performance Measures.

Principal Performance Measures

The Principal Performance Measures, which include Planning, Environment, Instruction, & Professionalism, are designed to support student achievement and professional best-practice through alignment of the Professional Standards for Educational Leaders (PSEL) consisting of (1) Mission, Vision, and Core Values, (2) Ethics and Professional Norms, (3) Equity and Cultural Responsiveness, (4) Curriculum, Instruction, and Assessment, (5) Community of Care and Support for Students, (6) Professional Capacity of School Personnel, (7) Professional Community for Teachers and Staff, (8) Meaningful Engagement of Families and Community, (9) Operations and Management, and (10) School Improvement. Included in the Performance Measures are Performance Indicators that provide examples of observable, tangible behaviors that provide evidence of each standard. The Performance Measures provide the structure for feedback for continuous improvement through individual goals that target professional growth, thus supporting overall student achievement and school improvement. Evidence supporting a principal's or assistant principal's professional practice will be situated within one or more of the four performance measures. Performance will be rated for each measure according to the four performance levels: Ineffective, Developing, Accomplished, and Exemplary. It is projected that most principals or assistant principals will maintain an Accomplished rating, but will occasionally have exemplary performance on standards at any given time. The summative rating will be a holistic representation of performance, combining data from multiple sources of evidence across each measure. The use of professional judgment based on multiple sources of evidence promotes a more holistic and comprehensive analysis of practice, rather than over-reliance on one individual data point or rote

calculation of practice based on predetermined formulas. Evaluators will also take into account how principals respond to or apply additional supports and resources designed to promote student learning, as well as their own professional growth and development. Finally, professional judgment gives evaluators the flexibility to account for a wide variety of factors related to individual principal performance. These factors may include school-specific priorities that may drive practice in one performance measure, experience level, and/or leadership opportunities. Contextual variables may also impact the learning environment, such as unanticipated outside events or traumas.

The Principal Performance Measures

PROFESSIONALISM	<p>Standard 2: Ethics and Professional Norms Effective educational leaders act ethically and accordingly to professional norms to promote each student's academic success and well-being.</p> <p>Standard 8: Meaningful Engagement of Families and Community Effective educational leaders engage families and the community in meaningful, reciprocal, and mutually beneficial ways to promote each student's academic success and well-being.</p>

Site visits are a method by which the superintendent may gain insight into the principal's practice in relation to the measures. During a site visit, the superintendent will discuss various aspects of the job with the principal, and will use the principal's responses to determine issues to further explore with the faculty and staff. Additionally, the principal may explain the successes and trials the school community has experienced in relation to school improvement.

Other District Certified Personnel/Administrator Components

Overview and Summative Model

The following graphic outlines the summative model for the other District Certified Personnel/Administrator Components:

Evaluators will look for trends and patterns in practice across multiple types of evidence and apply their professional judgment based on this evidence when evaluating a district administrator. The role of evidence and professional judgment in the determination of ratings on standards and an overall rating is paramount in this process. However, professional judgment must be grounded in the common framework identified: The District Personnel/Administrator Performance Measures that are aligned to the ISLLC standards.

Other District Certified Personnel/Administrator Performance Measures

The District Certified Personnel/Administrator Performance Measures are designed to support student achievement and professional best-practice through the alignment of the ISLLC standards of Vision, School Culture & Learning, Management, Integrity, Fairness, & Ethics, and Political, Economic, & Legal. Included in the Performance Measures are Performance Indicators that provide examples of observable, tangible behaviors and performances that provide evidence of each standard. The Performance Measures provide the structure for feedback for continuous improvement through individual goals that target professional growth, thus supporting continuous district improvement. Evidence supporting an administrator's professional practice will be situated within one or more of the four performance measures. Performance will be rated for each measure according to the four performance levels: Ineffective, Developing, Accomplished, and Exemplary. It is projected that most administrators will maintain an Accomplished rating, but will occasionally have exemplary performance on a measure at any given time. The summative rating will be a holistic representation of performance, combining data from multiple sources of evidence across each measure.

The use of professional judgment based on multiple sources of evidence promotes a more holistic and comprehensive analysis of practice, rather than over-reliance on one individual data point or rote calculation of practice based on predetermined formulas. Evaluators will also take into account how administrators respond to or apply additional supports and resources designed to promote continuous improvement, as well as their own professional growth and development. Finally, professional judgment gives evaluators the flexibility to account for a wide variety of factors related to individual performance. These factors may include district/department-specific priorities that may drive practice in one standard, an educator's number of goals, experience level and/or leadership opportunities. Contextual variables may also impact the learning environment, such as unanticipated outside events or traumas.
